

MEDICAL TECHNOLOGY

Work in a hospital laboratory. Evaluate bacteria samples. Look at infectious diseases or analyze blood types. Be a medical technologist and find a career in a hospital, clinical laboratory, in research development, genetic engineering, or laboratory equipment sales.

side *by* side

- Brian Goff, Parkview Hospital's clinical laboratory science program director speaks highly of Manchester students who do their final year at Parkview's facility. "It's a very intense and rigorous program," said Brian. "We have so much to teach; they have to be ready to learn. It's much like working a full-time job and taking accelerated classes at the same time. Manchester students simply haven't had any difficulties with our program. Students who come from strong academic programs like Manchester do well, and we've been very pleased with their performance."

academics *that* matter

Manchester professors help you stay on track with your career goals. You can take the 3+1 option (three years at Manchester

with the fourth year at Parkview Hospital in Fort Wayne, Methodist Hospital in Indianapolis or Saint Francis at Beech Grove in Indianapolis) putting you in the workplace a year ahead of others. Or, if you like the college atmosphere and want to complete your bachelor's at Manchester, you can do the 4+1. Manchester offers both options. It's your choice.

SUCCESS

- Katie Case '02 had previous experience as a phlebotomist before taking the medical technology program at Manchester. She completed her training with Parkview Hospital before accepting a position with Covance in Indianapolis, a testing laboratory for drug development services.
- Jessica Smith '03 didn't have prior laboratory experience before choosing her major. But she did extremely well and is a medical technologist at Kosciusko Community Hospital in Warsaw, Ind.

I FOUND

... CONFIDENCE

I was 400 miles from home in an unfamiliar setting. And I was taking classes that were overwhelming. My professor kept telling me, "You can do this!" After the first semester, it did get much easier. I took the 3+1 program and was in my final year at Parkview with a majority of students who were in the 4+1. The fact that I graduated the top of my class made me realize how well Manchester had really set me up for success.

Jessica Smith '03, medical technology major

Find your place.

If you're thinking of a career in medical technology, choose Manchester College and find your place. For more information or for a campus visit, call the Office of Admissions at 800-852-3648, e-mail admitinfo@manchester.edu or visit our website at www.manchester.edu.
