

PRE-MEDICINE (Biology-chemistry)

Choices. That's what studying biology-chemistry gives you. Opportunities to research, study abroad, go to medical school or prepare for a first job. Manchester's track record speaks for itself.

academics *that* matter

In the last ten years, 80 percent of MC graduates who applied to medical school were accepted. The national average is 45 percent. That means if you're even considering becoming a doctor, a vet, a dentist, a chiropractor or pharmacist, or most any other profession in the medical field, the chances of you succeeding are higher when you choose Manchester.

side *by* side

- Alicia Burkett '07 was surprised to get a call from her hometown vet asking her to go to New Orleans and help with displaced animals after Hurricane Katrina. Alicia was surprised too, when her professors all agreed she should go, even though it meant being out of class a week!

- Students Lauren Freel '09 and RJ Berish '09 are among those who joined a medical practicum team in January, delivering supplies and providing medical assistance to a rural site in Nicaragua.
- The experiences are out there if you want them. Talk to your professors. Ask how you can find internships. Chemistry major Amy Reidhaar '10 did and found an amazing opportunity for an internship at University of Massachusetts Amherst in renewable energy.

SUCCESS

- Andrea Numbers '07 received an Imagination Grant to research a surgical procedure used to correct heart arrhythmia. Her findings were published in a medical journal.
- MC grads prepare for a variety of professional careers: Ryan Gebfert '06 is studying dentistry in Pittsburgh, whereas Ben Felix '06 is at IU Medical School.

I FOUND

... THE BEST OF BOTH WORLDS

On my first visit to Manchester, I met Dr. Susan Klein, who made an awesome first impression on me. I found the best of both worlds: attentive professors and an amazing science facility.

Elizabeth Fall '08, biology-chemistry major
